USING HOME GROWN RATIONS

THE HOME GROWN RATION OPPORTUNITY OR HOME GROWN RATIONS SLASH FEEDING COSTS

The controlled feature of Advantage Feeders now gives farmers the opportunity to feed a wider range of products including home grown rations. This includes barley and other cereal grains. Often, these grains are combined with 30-40% protein pellets to formulate a complete ration at a vastly reduced price. Depending on your availability to grain, at the current feed prices, it is possible to make a complete 16% percent finishing ration for under £200/tonne. Advantage Feeders has an online calculator where you can put in your own input costs and work out exactly how much you will save.

ON OUR FULL YEAR FEEDING

THE MOST PRECISE RATION CONTROL FEEDER. HOW IT WORKS

Advantage Feeders 3-Way Restriction System precisely manages height, depth, and width, limiting tongue access to reduce wastage. After 5 minutes, livestock tongues become dry preventing further feeding. Livestock visit 5-10 times, promoting frequent, controlled supplementation in small amounts.

Set the 3-Way Restriction System to control sheep and cattle intake from 200g/per day to full ration of 2kg/per day. Contact us to discuss tailored feeding solutions on 08000 786 030.

NEW FLOW ASSIST FEATURE

See our website for all our NEW design features on select models

3-WAY
RESTRICTION
SYSTEM

*Prices quoted are for assembled units and include delivery to selected regions of the United Kingdom. Additional freight to other locations can be arranged at local cartage charges.
5500HD is not suitable for sheep & other smaller animals. *Advantage Feeders 5 year extended warranty excludes Air Rivet Tool and Blower Attachment. See the website for the standard 2 Year Warranty, Extended 5 Year Warranty, and the 30 Day Money Back Guarantee's full T&C's.

*The new HD design changes and upgrades will be available throughout 2025-2026. Please check the website or contact our sales team for stock availability.
